

Guidelines for Chunking Content

- We chunk the content for the purposes of recalling, retrieving, and comprehending information.
- Rule of 7: A chunk should have no more than 7+2 items.
- Rule of 20: Students should be able to finish a chunk within 20 minutes.
- If one chunk is too small for students to understand a concept, group several chunks into a manageable unit. The unit then serves as a structure to present and recall the concept.

Chart to Organize the Chunks

| Time | Reading Materials | Audio/Video Elements | Interaction Elements | Additional Elements |
|------|-------------------|----------------------|----------------------|---------------------|
| | | | | |
