

## PHC 6102 Principles of Health Policy and Management

### Quiz #1

#### Public Health Administration and Practice

Quiz #1 focuses on the Turnock video. However, students should also view the lecture and read chapter 2 prior to attempting the quiz. Quiz #1 uses multiple choice questions that are similar in design to questions used on exams. It provides an opportunity for students to understand how exam questions will be presented and how to select the best response. Similar to the exams, it is not possible to return to a previous question, even if it was left unanswered.

Potential quiz questions and answer choices are provided below. A discussion forum exists under the Class Discussions tab to discuss best responses to quiz questions with other students. Participation in the discussion is optional and not monitored by the instructors or T.A. Once taking the quiz, students should not participate in any further discussion of the quiz with other students.

1. According to Turnock, the 1988 IOM report *The Future of Public Health*:
  - A. provided consensus on essential public health services.
  - B. failed to crystallize essential public health services.
